Scientific Outreach Activities

- Lab Demonstrations:
  I have organized several Lab visits and Demonstrations for a wide variety of audiences, including the public and high-school, undergraduate and graduate students, and researchers.
- Foldscope Training:
  At Stanford University, I participated in several outreach microscopy workshops to help train high school and undergraduate students to learn how to use "Foldscope", a popular 1$ paper microscope.
- Social Media Outreach:
  I post broad layman summaries as Twitter threads or 'Tweetorials' including several videos to promote and disseminate our research. These tweets have engaged a wide variety of users, including both scientists and the public (several thousands); our lab Twitter account has >4k followers.
- Student Outreach Workshops and Talks:
  - My lab members and I conducted a workshop on Physics/Biology for UM First Star Academy students (K-12) (12/2021). First Star Academy is a program to encourage and support high-school students in the foster care system to pursue College and STEM education.
  - I also delivered a virtual marine biology class for middle school (7th grade) STEAM students at Aventura Waterways Preparatory Academy, a local School in Miami.

- Connecting Science and Art:
  I am collaborating with Jenna Efrein, a senior lecturer in glass in the Department of Art and Art History at UM. We are currently working on a project to use glass as a medium to make connections between Physics, Marine Biology and Glass. We have planned several outreach events and Art and Science exhibitions in collaboration with the Lowe Art Museum at UM.
